

APPENDIX A

WHAT IS SUBSPACE

For a number of decades respected scientists from all over the world have been carrying out experiments whose results oppose current biology and Newtonian physics. These studies supply us with abundant information about the central organizing force that governs our bodies and the rest of the cosmos. What they have discovered is nothing short of astounding! At our most basic level, we are not a chemical reaction, but an energetic charge. Human beings and all living things are a coalescence of energy in a field of energy connected to every other thing in the world. This pulsating field is the central force of our being and our consciousness, really the totality of our existence. There is no point where we begin and where we end in relation to the universe, only one unified underlying field. This field is known as Subspace.

THE XRROID EFFECT

The word Xrroid is defined as the testing of a patient Electro Physiological Reactivity to thousands of substances at biological speeds. Biological speeds are defined as those approaching the ionic exchange speed of a persons' electrical reaction to the items in their immediate environment. This is a speed of approximately 1/100 of a second. The Xrroid is the process of measuring a patients' reaction to such items as vitamins, homeopathies, enzymes, hormones, allersodes, isodes, nosodes, etc.

The Xrroid is the invention of Dr. Nelson and was first used in 1985 in the EPMX device of Eclon. This was registered with the FDA of America in 1989. The process has been greatly advanced technologically in the QXCI device. The Xrroid has been used on millions of patients around the world for over a decade.

The process has been clinically tested with results being published in medical journals and articles being presented in several world wide medical conferences. The users of the systems have sent in thousands of testimonials and reports of dramatic success come in daily. The users use the device as directed, which means seeing a patient once a week at best.

For over a decade occasionally someone with an overly suspicious mind will try to use the device not as directed but on someone repeatedly in the same day. They will check some over and over in the same day. They will report back to us with dismay as that even though the first results are always accurate the second or third

results seem to not be. Often these reports come from persons who cling to older technology or have ulterior motives. So often the reports have not been checked. But recently when the Chinese distributor had a similar comment the Chinese representative had an observation. Could it be that the Xrroid test might produce some effect on the EPR of the patient?

The tickle of testing a person to thousands of items at fast speeds seems to promote an increase in the wellness of the EPR field that promotes a change or destabilization in the EPR field of the patient. This will lead to inaccurate Xrroid results for a period of up to 48 hours. So for this time the therapies can be done successfully but the Xrroid will be less accurate.

Patients will have hyper-reactivity states after testing. Some patients report heightened sense of taste, smell, coordination, flexibility, and even ESP. Some are not aware of the difference and their other family members report noticing the change. During this period the Xrroid retesting will often be inaccurate. But therapies can be used during this time. The recovery time appears to vary depending on the patient condition. The recovery time can be from 24 hours minimum to 100 hour maximum.

Our tests have shown that the Xrroid itself has healing effects as patients have improved trivector patterns. Athletes consistently report heightened reflexes, improved coordination, and faster motor skills. After one Xrroid test there are several improvements in clarity of thought process, eye hand coordination, etc. But after two or more Xrroid test a state of hyperactivity can ensue for hours or days. Please keep the Xrroid tests to a minimum. This change in EPR shows just how effective the Xrroid is. I hope this will help the skeptics in properly charting out the challenge of the QXCI.

RIFE FREQUENCIES

Royal Raymond Rife, a Nebraska-born scientist, developed a safe, effective and non-invasive healing device known as the Beam-Ray. The Beam-Ray successfully helped many people overcome life threatening diseases by eradicating deadly microbes from their system. Every living organism has a rate of oscillation or resonant frequency at which it vibrates; microbes/pathogens are no exception. The Beam-Ray, now commonly referred to as a Rife Generator was designed to emit the resonant frequency at which each microbe vibrated, thereby inactivating the microbe or shattering it apart. The Rife Generator sends out these resonant frequencies via radio waves, whereas the QXCI Rife Generator transmits frequencies electromagnetically at biological levels. It has been said that the QXCI Rife Frequency Generator is not a true Rife due to this difference. None the less, it is important to realize that practitioners are having wondrous results using the Rife frequencies.

Thus the same frequencies that are utilized for the Rife Generator can also be utilized with the QXCI Rife - like Frequency Generator.

An excellent source for determining which frequencies to program for any specific ailment is: **The Handbook of Rife Frequency Healing**, written by Nina Silver.

PROBE AND ROLLER USE

These attachments enable treatment waveforms to be highly focused and therefore potentially more effective for specifically localized treatment. In the Test and Dental screens it is possible to aim the output to the point probe for any item in the Test Matrix. Within the Dental and Body Scan and Face Therapy specific therapies for the roller and point probe are available. The harness continues to be worn during treatment as the wave form goes through both outputs simultaneously benefiting the client.

Example areas of application are:

PROBE:

- Any ITEM from the test matrix (3sec or 3 min zap)
- Dental
- Cavity repair
- Infection
- Gingivitis

ROLLER:

- Aging lines
- Cellulite (YAHOO!)
- Facial
- Warts
